

Reach the Toughest Spots with Ease

Introducing the Crevice Scrub, with a V-shaped filament pattern, differentiated filament thicknesses and a detachable swivel head.

Scrub Brush
for high-power
detail cleaning

Hunt down dirt with the power of V

Corners, edges, grouting between tiles and narrow spaces. These are some of the toughest areas to clean using traditional scrub brushes. Because of this, such areas are high-risk zones for deposits of dirt and potential contaminants.

To help you clean these areas easily and effectively, we've developed the unique Crevice Scrub with its powerful V-shaped brush filament pattern and differentiated filament thicknesses.

The V shape makes sure you get into every nook and cranny, while stiffer filaments in the centre of the brush head loosen dirt and food particles for effective removal by the softer bristles at the sides.

Swivel your way

To inaccessible areas

Detail cleaning under cabinets, tables and equipment is notoriously difficult, and hard on your back and knees.

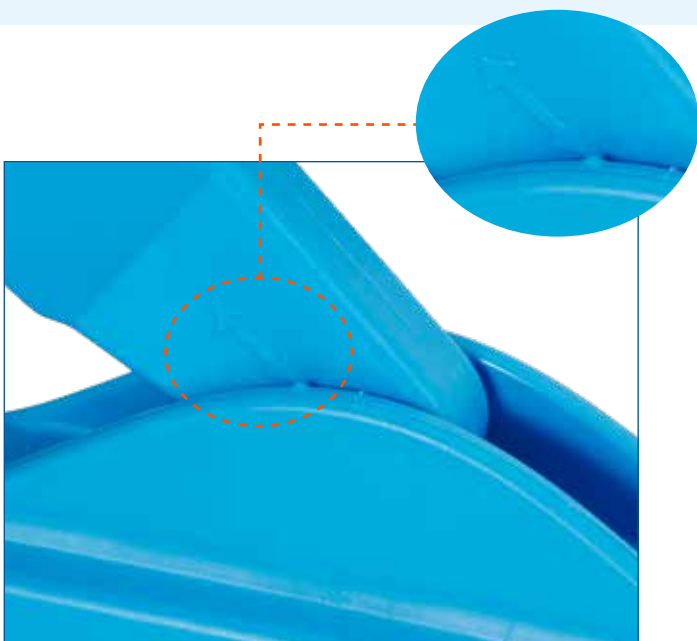

The Crevice Scrub solves the problem with an ergonomic swivel function that lets you lay the handle down almost parallel to the floor. In this position, you can move the brush into and around the gaps between the floor and fixtures and fittings – without getting down on your knees.

Hygienically designed clip fit handle

Thorough cleaning of all cleaning tools is a cornerstone of good hygiene, and the joint between a brush head and handle is a common trouble spot. By enabling you

to easily remove the head from handle prior to cleaning, the Crevice Scrub makes sure you can thoroughly clean this joint of dirt and potential contaminants.

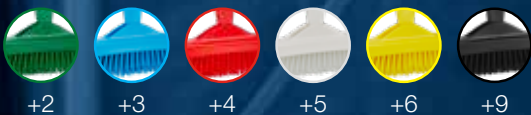

Easy brush head removal

To remove the Crevice Scrub brush head from its handle:

1. Swivel the handle so the arrow aligns with the dot on the brush head (the brush is never used for cleaning with the handle in this position, so there is no risk of accidental head removal during use).
2. Hold down the brush head and give the handle a firm tug to remove.
3. Clean your brush head and handle thoroughly!

Like all Vikan products, the Crevice Scrub has been designed in close collaboration with customers who use our brushes every day. To meet your colour-coded segregation needs, the brush comes in White, Yellow, Red, Green and Blue.
