

Ultra Safe Technology

Tank Brush

Raising the standard for
security, safety, hygiene, and efficacy

A revolutionary design delivering unmatched benefits

Discover the new Ultra Safe Technology Tank Brush

Vikan embarked on a rigorous innovation journey to create a brush that doesn't just meet but redefines the expectations for hygiene in sensitive environments.

The UST Tank Brush provides unmatched bristle security combined with an exceptionally hygienic, easy-to-clean design—solving a challenge many thought insurmountable.

With our latest addition to the UST Range, Vikan continues to set the benchmark for secure, safe, hygienic, and efficient cleaning in the food and beverage industry. Engineered with patented Ultra Safe Technology, our tools deliver unmatched performance and reliability, ensuring your cleaning processes are safer and easier than ever before.

Security

Exceptional bristle retention: Engineered to minimise bristle shedding, individually moulded bristles reduce the risk of foreign body contamination.

Optimised brush lifespan: Compared to traditional drilled and stapled brushes, losing one bristle doesn't compromise the security of the others, meaning UST brushes can be used safely and effectively for longer.

Hygiene

Hygienic design: The fully moulded construction minimises nooks and crannies where contamination can hide, optimising hygiene by reducing potential harbourage points.

Colour-coded versatility: Compatible with all Vikan handles and available in 8 colours to support effective hygiene and food safety tool segregation.

Safety

Food contact compliant: Made from EU and FDA food contact compliant materials, rigorously tested to meet the highest food safety standards.

Exhaustive documentation: To facilitate compliance and the auditing process, all UST and Vikan Hygiene Range tools come with complete documentation of regulatory compliance.

Efficacy

Lightweight and ergonomic: Designed for ease of use, the lightweight construction reduces operator strain during extended tasks.

Cleaning performance: The purpose-designed flared bristle pattern and a rounded head shape ensure effective cleaning of tanks and vessels, while stiff bristles allow extra pressure to tackle heavy soils with ease.

ULTRA SAFE TECHNOLOGY is part of Vikan's ambition to create the most secure, safe, and hygienic cleaning tools for the food and beverage industry. Rigorous testing has proved great functionality, durability, and chemical and thermal resistance. Our award-winning and patented designs provide these benefits across the full UST Range:

- Easy to clean, dry, and visually inspect, reducing the risk that the tools become sources and vectors of contamination.
- Smooth surface finishes with no acute internal angles, metal staples, or resin, minimising harbourage points for allergens and microorganisms.
- Excellent bristle security lowers the risk of foreign-body contamination when used on food contact surfaces.
- Constructed from EU and FDA food contact compliant materials that are fully tested and documented.
- Unique bristle patterns provide high cleaning efficacy, reducing time on task.
- Strong, durable, light, and ergonomic construction improves brush life and reduces user fatigue.

UST Tank Brush
Hard
Art. no: 7030x

UST Hand Brush
Hard
Art. no: 3891x

UST Short Handled
Hand Brush, Stiff
Art. no: 4179x

UST Broom,
Soft
Art. no: 3171x

UST Long Handled
Hand Brush, Stiff
Art. no: 4196x

UST Broom,
Medium
Art. no: 3173x

UST Bench Brush,
Soft
Art. no: 4581x

UST Deck Scrub,
Stiff
Art. no: 7064x

UST Bench Brush,
Medium
Art. no: 4585x

UST Detail Brush,
Soft
Art. no: 555130x
