The Vikan Heavy-Duty Push Broom

Designed from US food and beverage manufacturer feedback, the Heavy-Duty Push Broom has key features that those with large areas to clean will love. The broom head is heavier, making it easier to maintain contact with the floor during sweeping. The angle cut of the bristles also helps prevent skipping or hopping during long pushes across production flooring. Flared bristles reach into corners and wall junctions to make cleaning easier and more thorough. With more densely packed stiff and soft bristles to sweep both fine and larger debris, the Heavy-Duty Push Broom will become an indispensable part of your sanitation regimen.

Features

The 24" wide broom block has **more bristles** than other models. The front two rows use stiff bristles to loosen and sweep stubborn and larger debris.

The four rows of soft bristles in the back are designed to sweep small and fine debris.

The broom head is heavier than other Vikon models to **better maintain contact with floors** during sweeping.

The angle cut of the bristles from front to back **improves effectiveness** and **prevents skipping** or hopping while being pushed.

The bristles on the ends flare out to **reach into wall and floor junctions**.

Brooms come in up to 10 colors so they can **fit into most color-coding plans**.

The broom comes in **16" and 24" lengths** so you can use the best fit for your facility.

Vikan push brooms
