

Angle Device w/Thread

140 mm, Black

Item Number: 29989

Add flexibility and reach to your cleaning tools with the threaded Angle Device. Designed to be used between a Vikan handle and a compatible cleaning tool, this adapter creates an angled working position that makes it easier to clean hard-to-reach surfaces above, below and around equipment. The angle device can be adjusted to different angles, allowing users to optimise the cleaning position for specific tasks and surfaces.

It is ideal for accessing the tops of machinery, the undersides of conveyors, pipework, tanks and other areas that are difficult to clean with a straight handle.

Helps improve reach, cleaning efficiency and operator ergonomics.
