

Detail Brush, Small Narrow Head & Scraping Edge, 5 pcs.

7.9" Stiff, White

Item Number: 44105

The Vikan Detail Brush with Small Narrow Head and Scraping Edge is a compact, toothbrush-sized cleaning brush for the tightest crevices, seals, joints and machine components in food production and hygiene-critical environments - spaces too small for a standard detail brush to enter cleanly.

A long, slim handle with a finger-stop grip - unique to this brush in the series - gives precise control when working in those confined spaces. Hard bristles and a front scraping edge loosen residue without sacrificing accuracy on fine work; this brush is built for precision rather than heavy-duty scrubbing volume.

Built with a polypropylene handle, polyester bristles and stainless steel staples, and made in Denmark, the brush is produced from EU, UK and FDA compliant raw materials. A drop-shaped hanging hole is designed to prevent pooling liquid, and color-coded variants support hygienic zoning plans and 5S programs.

At 0.5 ", the Detail Brush with Small Narrow Head has the narrowest head of the three products in this detail brush series - narrower than both the Detail Brush with Narrow Head and the 0.7 " Grout Brush with Scraping Edge. It's sized to replace an oversized toothbrush that's been pressed into service for detail cleaning, and to reach jobs too tight even for the 4408x.
