Upright Dustpan and Broom Set, 330 mm, Medium, Yellow

The contact lip is designed for easy and efficient sweeping into the dustpan. The outer front surface has a raised area to prevent debris from falling out of the dustpan. The enlarged rear and side walls enable the dustpan to hold larger volumes of debris. The very effective, lightweight broom can be used for sweeping both dry and wet debris. The brush pattern is designed using 2 filament diameters. The outer row of filaments is softer than the middle row, which gives a very effective sweeping quality. The filaments under the scraping edge are angled to facilitate sweeping close to walls and corners as well as under workbenches etc. An effective scraping edge has been implemented in the design to enable loosening stubborn debris from the surface.
