ONE-PIECE PIPE BRUSH

PRODUCT	DESCRIPTION
538190	Pipe Brush w/handle, one piece, Ø90 mm, Medium/stiff

TUBE BRUSHES

PRODUCT	DESCRIPTION
5362	Cleaning set w/3 brushes, Ø2, Ø5, Ø6 mm, Soft
5363	Tube Brush, Ø9 mm, 375 mm, Medium
5360	Tube Brush, Ø15 mm, 310 mm, Stiff
5375	Tube Brush, Ø10 mm, 480 mm, Stiff
5376	Tube Brush, Ø20 mm, 500 mm, Medium
5378	Tube Brush, Ø40 mm, 510 mm, Stiff
5379	Tube Brush, Ø50 mm, 510 mm, Medium
5370	Tube Brush, Ø60 mm, 510 mm, Medium

TUBE BRUSH HEADS

PRODUCT	DESCRIPTION
5354	Tube Brush head f/flexible handle 53515* or 53525, Ø12 mm, 200 mm, Medium
5365	Tube Brush head f/flexible handle 53515* or 53525, Ø20 mm, 200 mm, Medium
5368	Tube Brush head f/flexible handle 53515* or 53525, Ø40 mm, 200 mm, Medium
5356	Tube Brush head f/flexible handle 53515* or 53525, Ø60 mm, 200 mm, Medium
5391	Tube Brush head f/flexible handle 53515* or 53525, Ø90 mm, 200 mm, Medium

*Extension Rod (5346) can be added to Flexible Rod (53515).

PIPE BRUSH HEADS

PRODUCT	DESCRIPTION
538050	Pipe Brush head f/handle, Ø50 mm, Stiff
538063	Pipe Brush head f/handle, Ø63 mm, Stiff
538077	Pipe Brush head f/handle, Ø77 mm, Medium
538090	Pipe Brush head f/handle, Ø90 mm, Medium
5380103	Pipe Brush head f/handle, Ø103 mm, Medium
7035	Meat Mincer Brush, Ø135 mm, Medium

Break through the Barriers to Better Hygiene

with the new One-Piece Pipe Brush from Vikan

Vikan offers pipe and tube cleaning brushes in a wide range of sizes

One-Piece Pipe Brush Tube Brushes Tube Brush Heads Pipe Brush Heads

Effective cleaning requires a brush head of the correct diameter:

More hygiene, more cleaning power

The Vikan One-Piece Pipe Brush marks another step forward for hygiene and cleaning efficacy in the food and beverage industry and any other sector where hygiene is critical. Designed for cleaning for example meat mincers, wine industry tank outlets and any straight pipes where a 90 mm diameter is optimal, the One-Piece Pipe Brush boasts several innovative features that enhance and deliver greater cleaning power.

Hygienic one-piece design

Manufactured with no joint between the handle and brush head, the One-Piece Pipe Brush removes a common repository of dirt and food contaminants. A hygienically designed drop-shaped hanging hole allows for easier cleaning and means you can hang the One-Piece Pipe Brush on all Vikan wall brackets. And to aid cleaning tool segregation, the brush is available in six colours.

Differentiated filament thickness

When cleaning, it's the tips of the brush filaments that do most of the cleaning. If the filaments aren't stiff enough – especially at the end of the brush head – they can bend and prevent the filament tips from doing their job. The One-Piece Pipe Brush features extra-stiff filaments at the end of the brush head, enabling you to clean more quickly and effectively. The stiffer filaments also improve cleaning efficacy where pipes end in joints etc.

A complete family of pipe and tube brushes

The One-Piece Pipe Brush is the latest member of a complete family of Vikan pipe and tube brushes. Encompassing tube brushes, detachable pipe and tube brush heads in many sizes and a wide range of handle options, these products make Vikan your one-stop shop for all hygienic pipe and tube cleaning needs.

Top tip

When selecting a tube or pipe brush, make sure the brush head is not too wide for the pipe, so that the filament tips – which do most of the cleaning work – are able to touch the tube or pipe walls.

Pipe Brush Heads

Designed for use in straight-pipe applications requiring a long handle, or for cleaning large round tank outlets and drains. Can be used with any Vikan threaded handle.

Tube Brush Heads

Designed for cleaning longer straight or slightly curved tubes such as level gauges on tanks, these heads fit on any Vikan flexible handle. Choose our flexible nylon handle for tubes with sensitive walls.

One-Piece Pipe Brush

Designed for use in straight-pipe applications, such as meat mincers, where a 90 mm diameter is optimal.

Tube Brushes

Used for cleaning short tubes – including slightly curved tubes – and smaller outlet openings. Also very useful for cleaning hard-to-reach areas on various equipment.
