Metal Detectable Mixing Paddle, 52", Blue

Remco
a Vikar company

This two-in-one tool is handy for both mixing and scraping, and is great for a variety of applications such as soup, confectionery, dough, and sauce manufacturing as well as many other food processing or other mixing tasks. One-piece construction and the unique long-handle design make it easy to use for many jobs. The semi-ferrous additive in this paddle allows for use in conjunction with a metal detectable system. Metal detectable plastic is a lightweight and less costly alternative to stainless steel mixing paddle scrapers, and will reduce fatigue for the user.
