ADVANCING HYGIENIC CLEANING

This Microfibre Cloth with unique cleaning properties removes up to 99.9% bacteria. The cloth works by attracting dirt and drawing it via capillary action or static electricity. Used dry, it picks up even the tiniest dust and dirt particles. Used damp, it absorbs dirt and grease through capillary action.

Wash the products as soon as possible after use - to reduce the risk that dirt becomes ingrained with stains and odours as result.

First wash should be done at minimum 85 ° C and separately to avoid staining

Wash cloths and mops of various types separately, to avoid contaminating each other with lint.

Pre-rinse in cold water with frequent water change, no added chemicals - in order to remove any chemicals that can have been used for cleaning and may interfere with or cause a negative impact on the fabric at higher temperatures in the washing process
