Easily tackle large-scale cleaning tasks with the Foaming Set. It can handle 8 bars of pressure and has an ergonomic grip that won't slip, even when wet.

Each version comes in 5 colours and has a set of 15 colour-coded nozzles for different chemical concentrations.

Never allow chemicals directly through the foaming gun.

When the foam application is finalized, it is important to rinse the injector with clean water to avoid blocking of the nozzle. Screw the injector of the container and let it suck clean water through the suction hose to enable hose, filter and nozzle to be rinsed for chemicals.
